Education

SIR M VISVESVARAYA INSTITUTE OF TECHNOLOGY, BE in Information Science

Sept 2023 – Sept 2027

- GPA: 8.1/10.0

Technologies

Languages: C,C++, Dart, Python, SQL

Databases: MongoDB, SQLite, Firebase Firestore

Frameworks: Flutter, Material-UI, BLoC, Provider

Tools: Git, GitHub, VS Code, Postman

Experience

Mobile App Developer Intern

Jan 2026 – Present

WhiterApps — Flutter, Firebase, BLoC

Remote

- **Architecting scalable cross-platform applications** using **Flutter** and **BLoC** for predictable state management.
- **Integrating Firebase services** for real-time data sync, cloud storage, and secure authentication.

Projects

FavPlaces – Personal Location Journal | *Flutter, SQLite, Google Maps API*

github/FavPlaces

- **Developed a feature-rich journaling app** using **Flutter** that enables users to catalog locations with high-resolution images, custom metadata, and precise GPS coordinates.
- **Integrated Google Maps API** to provide seamless **location picking** functionality, rendering interactive map previews and calculating real-time addresses for saved markers.
- **Architected a robust local storage layer** with **SQLite (sqflite)** and managed complex application state using **Provider** to ensure data integrity and full offline functionality.

SURAKSHA-SETU - Tourist Safety Monitoring | *Flutter, Google Maps API, Blockchain*

github/Tourist

- **Engineered an end-to-end safety ecosystem** for **Smart India Hackathon 2025**, featuring live location tracking and geospatial visualization via the **Google Maps SDK**.
- **Developed a Safety Score Algorithm** utilizing **geofencing** to monitor high-risk zones, automatically triggering multi-channel **SOS alerts** with live coordinates to emergency contacts.
- **Implemented Blockchain-based Identity (DID)** for secure, tamper-proof user verification, maintaining high performance under low-bandwidth conditions using the **Provider** pattern.

Personal Portfolio Website | *Flutter, Dart, Firebase, Firestore, BLoC*

github/Portfolio

- **Developed a responsive portfolio website** using **Flutter and Dart** to showcase projects, skills, education, experience, and contact information in a clean interactive interface.
- **Integrated Firebase and Cloud Firestore** to dynamically manage portfolio content, project details, media links, and user lead submissions without hardcoding data.
- **Implemented project cards, contact form, analytics, and media previews** with smooth navigation and optimized UI for both desktop and mobile web users.

Achievements & Leadership

- Solved **200+ LeetCode problems**; active in competitive programming to enhance algorithmic skills.
- Member of **TechHub** and **GLUG**; contributed to workshops and ideathons as part of the **Social Team**.
- Mentored **25+ students** in **Flutter** during **CSOC**, focusing on state management and UI design.
